

# Cleaning Your CoolCat™

We understand that a clean CoolCat is a happy CoolCat, and that cleanliness is next to coolness! So, to avoid the dreaded build-up of mold and bacteria, it's essential to clean your CoolCat after every use!

Now, let's get down to business!

1. Bid Farewell to the Last Drop - Once your CoolCat has served its purpose and your beverage adventure comes to an end, it's time to empty your vessel of joy and pour out any remaining liquid.
2. To kickstart the cleansing ritual, fill your CoolCat with a bit of warm water and, using a clean hand towel or sponge, lightly scrub every nook and cranny of the cannister and lid, ensuring no funkiness is left behind. Once you're satisfied with your effort, it's time to simply rinse away the remnants by emptying the hose and cannister.

OK, now for the most important step in the process ... **Bottle Bright!** CoolCat is proud to partner with **Bottle Bright** ... the safest, simplest, and most effective cleaning product for all drinking containers.

3. Simply fill your CoolCat with a half-gallon or so of warm water and drop in 1 **Bottle Bright** tablet. Now let it remain the water for 15 - 30 minutes so **Bottle Bright** can work its magic!
4. Let the Pump Do Its Thing - Turn on the pump, press the spigot and let all the liquid run through the hose to flush out any remaining liquid or stubborn residues. It's like a mini spa treatment for your CoolCat.
5. Almost there, but not quite! Grab some paper towels or a trusty clean rag and give your CoolCat a good wipe down. And voila! You've successfully completed the sacred ritual of cleaning your CoolCat, ensuring your beloved beverage dispenser remains ready for your next epic adventure!

When storing, we recommend keeping the lid open to let it dry completely. We don't want any residual moisture sneaking around, do we?

## BOTTLE BRIGHT CLEANING TABLETS

**Bottle Bright** is the biodegradable, stain-fighting cleaning tablet that takes your toughest-to-clean bottles to task. Easy-to-use and ultra-efficient.

**Bottle Bright** tablets dissolve in water creating tiny, effervescent bubbles that power through stubborn stains and odors.

- Biodegradable, chlorine-free & environmentally safe
- Works great on stainless steel, plastic, TPU, glass, porcelain, silicone & metal.
- Made in the USA.

### It's as easy as...

#### DROP

Fill CoolCat with warm water & drop in one **Bottle Bright** tablet

#### FIZZ

Let it stand for 15-30 minutes while the bubbles do their magic

#### FLUSH

Empty your CoolCat, flush remaining water through the spigot and you're ready for your next use.
