

# User Instructions

It really is as easy as we say ... just CHILL, FILL, PRESS & POUR!

But, for the more detail-oriented folks amongst us, we've prepared this step-by-step guide for you to fully harness the true power of CoolCat™.

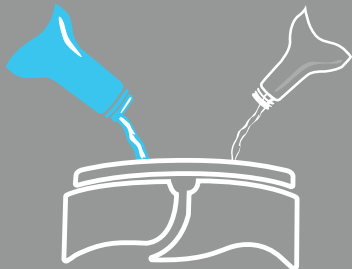

**1** To awaken your CoolCat, start by charging it through the smaller charging port. During this process, the button above the Dual USB charging ports will illuminate to a shade of green until fully charged.\*

**2** Open Wide! Once your CoolCat is charged and ready, flip the latches and lift the lid to reveal your gateway to beverage heaven!

**3** Ice, Ice, Baby! Remember, CoolCat is not a fridge — it needs a little help to keep things frosty. Pack it with enough ice to rival the Arctic!

**4** Fill 'er up! It's a big, bold beverage world out there. Go ahead and get creative with adding whatever beverages ... adult or otherwise ... your inner mixologist's heart desires.

**5** Mix 'er up! If you decide to add more than one beverage, be sure to stir it up, my friend! Blend those flavors and let your taste buds go wild.

**6** Seal the Deal! With your drinks and ice in place, close the lid and latch it back up. Then, make sure the pressure release valve is closed — no leaks allowed!

**7** Showtime! Ready to unleash the power of the CoolCat? Just press the little round button above the USB charging port to engage the pumps motor. It will illuminate to a cool blue light\* and briefly purr to let you know it's ready for action!

**8** Nice hose! Time to unfurl its very impressive 39" cat-tail hose ... the secret weapon that prevents you from "tipping & dripping" and "fumbling and bumbling!"

**9** The time has come ... to gently press the spigot and watch in awe as your chosen elixir pours forth, like a majestic fountain of liquid joy.

**10** Keep it tidy, 'Cat - When you're not busy pouring drinks like a master mixologist, store the hose in the recessed channel or on one of the handy latch clips.

**11** Charge 'em up! Phones, portable speakers, or whatever ... while enjoying the coolness of CoolCat. Simply remove the attached cover of the USB port to reveal a world of charging options — USB 3.0 and USB-C, all at your fingertips.

**12** Time for a deep cleansing breath - When the time comes to bid your beverage farewell, press the pressure release valve, allowing any remaining coolness to return to the depths of CoolCat's lair.

**13** Unlock the Magic Again - To fully savor the CoolCat experience, open the latches and lid, revealing the empty vessel yearning for its next refreshing adventure.

**14** Remember ... a clean 'Cat is a happy 'Cat! Once the party has wrapped, be sure to empty any remaining beverages from your CoolCat, and closely follow the cleaning instructions at [www.thecoolcatcooler.com](http://www.thecoolcatcooler.com) to keep your 'Cat purring at its best.

Now that you've got the full picture, it's time to ...

## Chill, Fill, Press & Pour!
